

Instant Pot® IP-DUO Series

7-in-1 Programmable Pressure Cooker, Latest 3rd Generation Technology, Stainless Steel Cooking Pot (8Qt, 6Qt and 5Qt) and Stainless Steel Exterior

If you live a fast-paced, health-oriented and green-conscious life style, Instant Pot is designed specifically for you.

Instant Pot is a smart Electric Pressure Cooker designed by Canadians with the objectives of being *Safe, Convenient and Dependable*. It speeds up cooking by 2~6 times using up to 70% less energy, and, above all, produces nutritious healthy food in a convenient and consistent fashion.

Convenience, Simple as Pressing a Button

Instant Pot IP-DUO series is a 7-in-1 programmable cooker, built on our best-selling IP-LUX series. IP-DUO combines the functions of a pressure cooker, slow cooker, rice cooker/porridge maker, steamer, sauté/browning, yogurt maker and warmer. Using the 14 built-in smart programs (Soup, Meat/Stew, Bean/Chili, Poultry, Sauté, Steam, Rice, Porridge, Multigrain, Slow Cook, Keep-Warm, Yogurt, Pasteurize and Fermented Rice), your favorite dishes are within the reach of pressing a button. Green peas, sweet corn and baby carrots can be steamed in 2 to 3 minutes, fresh or frozen. To make mashed potato, don't boil potatoes in water for 50 minutes

leaching nutrients into the water; steam them in Instant Pot for just 15 minutes. An entrée of chilli or Irish stew can be done within an hour, without you watching over it.

To tailor for varying tastes and food conditions, the programs come with 3 adjustable modes. Special features include 3 temperatures in Sauté for browning, simmering or thickening, and 3 temperatures in Slow Cook to complete the tasks of a common slow cooker. Most traditional, modern and international recipes can be easily adapted for Instant Pot.

A 24-hour timer allows for delayed cooking. Automatic keep-warm holds the temperature of the food until you are ready to serve. It works as a perfect porridge maker allowing you wake up with a fresh made porridge.

Instant Pot generates almost no noise and leaks no steam. It traps all the aromas in the food. It cooks food without heating up the surroundings. It is truly a kitchen-friendly appliance. The 3-ply bottom stainless steel inner pot is extremely durable and leaves no health concerns of non-stick coating residual. The new slim body design has a smaller foot print and lid holders for both left- and right-handed users. The brushed stainless steel exterior is finger print resistant. Its elegant and durable industrial design makes it easy to clean and pleasurable to use for the years to come.

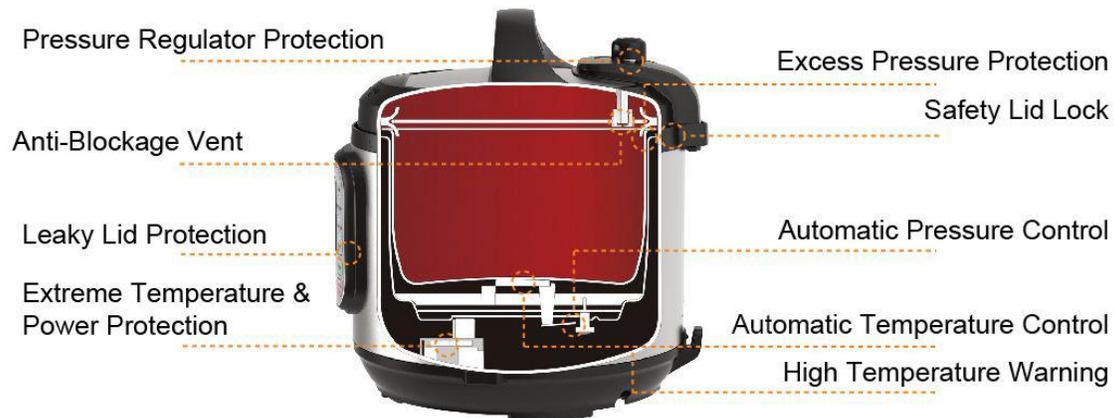

Dependable Consistent Results

Instant Pot IP-DUO series uses the latest 3rd generation technology with an embedded microprocessor. During the cooking process, the microprocessor monitors the pressure and temperature, keeps time, and adjusts heating intensity and duration. Even the volume of food is also taken into consideration. The cooking programs have been lab-tested hundreds of times for optimal effect. These greatly improve cooking results and maintain consistency.

Safety without Compromise

Instant Pot has been carefully designed to eliminate many common errors from causing harm or spoiling food. It has passed the stringent UL & ULC certification giving you uncompromised safety and peace of mind. Instant Pot protects you with **10 proven safety mechanisms and patented technologies.**

1. Safety Lid Lock prevents accidental opening while the cooker is pressurized
2. Pressure Regulator ensures working pressure to be under the safety limit of 15.23psi (105kpa)
3. Smart detection of leaky lid (e.g. steam release is at open position)
4. Anti-blockage Vent design prevents food debris from blocking the vent
5. Using a magnetic sensor, Lid Position Detection monitors whether the lid is in an unsafe zone for pressure cooking.
6. Automatic Pressure Controller keeps pressure always in the safe range
7. Excess Pressure Protection releases excess pressure into internal chamber in a dangerous situation
8. Automatic Temperature Control regulates temperature based on the type of program being selected
9. High Temperature monitoring avoids burning food
10. Electrical current and temperature fuse cuts off power if the current or internal temperature exceeds safety limits

Features

- **7-in-1 Multi-Functional Cooker:** Pressure cooker, Slow cooker, Rice Cooker/Porridge Maker, Steamer, Sauté/Browning, Yogurt Maker & Warmer
- **10 Proven Safety Mechanisms, UL and ULC certified**
- **14 Micro-Processor controlled programs:** Soup, Meat/Stew, Bean/Chili, Poultry, Sauté, Steam, Rice, Porridge, Multigrain, Slow Cook, Keep-Warm, Yogurt, Pasteurize and Fermented Rice (Jiu Niang)
- **Dual pressure settings** for fast and flexible cooking: Cooking with the high pressure reduces cooking time by up to 70% and the low pressure avoids overcooking delicate food
- **Yogurt Maker** function can heat the milk for pasteurization and fermentation, making yogurt in either jars or the cooking pot for up to 5L of milk.

- **3 Adjustable Modes for most functions. 3 Sauté temperatures and 3 Slow Cook temperatures**
- Slow Cooker function allows selecting time between 0.5 ~ 20 hours
- **Delay Cooking Timer:** Up to 24 hours
- Manual pressure setting: Up to 120 minute cook time
- Automatic keep-warm: up to 10 hours
- Manual keep-warm setting: Up to 99 hours and 50 minutes
- Highly energy efficient saving up to 70% of energy
- **3-ply bottom Food Grade 304 (18/8) stainless steel cooking pot** for durability
- **Finger-print resistant brushed stainless steel exterior**
- Low profile 18/8 stainless steel steam rack with handles to lower and lift food into and out of the cooking pot, for maximal usable space
- Accessories included: stainless steel steam rack with handles, condensation collector, rice paddle, soup spoon and measuring cup
- User Manual and Quick Reference Guide **in English, Spanish, French and Chinese**, Pressure Cooking booklet and cooking time tables are included
- IP-DUO series come with three models:
 - IP-DUO60: 6qt cooking pot and 1000W heating element
 - IP-DUO80: 8qt cooking pot and 1200W heating element
 - IP-DUO50: 5qt cooking pot and 900W heating element
